Modular Sign Holder Kits

Retail sign holder frames are useful for instore signage and merchandising. Frameless, plastic and metal sign holders are also a great way to display promotional material.

We carry a wide variety of sign holders in imperial and metric sizes

How It Works: Modular Signage Solutions

Select the size frame:

We stock a wide variety of frames in both imperial and metric sizes. Our patented locking mechanism keeps the sign securely in place, allowing you to display the frame vertically or horizontally.

Add a base and accessories:

Our bases and mounting accessories let you tailor the frame to suit your specific application.

The perfect signage solution:

With our combination of frame sizes, accessories and experience, we can help you with solutions to all your sign display needs.

Clear Sign Holders

Our Clear Sign Holder solutions provide an effective way to advertise your new products, sales or services on tables, countertops and shelves.

Spring Coil Mount

When it comes to displaying in-store signage, coil mounts give you unparalleled flexibility. The coil stretches to accommodate shelves up to several inches thick. Reuse it as often as needed. It won't scratch, so it's perfect for wood and delicate surfaces.

Wobbler

The Wobbler is one of our most versatile sign holders. Signs hang directly from the Wobbler's hook for an interesting free-floating effect. The curved stem can hang signs above and in front of products sitting on shelves or hanging on pegboard or wire. Moulded in polycarbonate, the Wobbler is available in clear, black and white.

SIGN HOLDERS

Pivoting Sign Clip

This versatile sign clip holds a graphic card. It mounts directly to C-Channel as well as slatwall, wire, bowl and shelf front channel.

Slatwall

Bowl

Wire Fence

Shelf Front

Shelf Mount Sign Gripper and Frame Holder

Fits most perforated shelves. Sign holder version works with standard sign frames and gripper version holds card stock. Available in beige, black, and white.
